

CDS/SDS Fluid supply system

Model: SA-CSFSS-48LS

SA-CSFSS-48LS realizes centralized and automatic chemical delivery with reliable pipe sleeve structure to prevent leakage. It supports automatic formula blending and drum switching to ensure uninterrupted supply. Built with comprehensive monitoring and alarm functions, it detects abnormal conditions timely. Fully compliant with industrial specifications, it cuts manual risks and delivers stable, safe and efficient fluid supply for semiconductor production.

Feature

- Centralization and Continuous Supply
- Automatic Ratio Matching and Switch
- Convenient Transportation
- Prevent Leakage
- Fault Detection Alarm Function
- ISO9001 Quality Assurance

Application

- Wafer Wet Cleaning Process
- Wet Etching
- Lithography
- Photomask Reticule Cleaning
