

450mm Fully automatic furnace tube cleaning machine

Model: SA-FTCM-48LS

SA-FTCM-48LS adopts high-performance materials to endure acidic corrosive environments. It supports flexible operation modes and features automatic rotation and flushing functions. The chemical solution can be recycled to cut costs. All circuits and components are professionally treated for corrosion resistance, with reliable air protection. It operates safely and stably, complying with industry norms for semiconductor production.

Feature

- Long-time Acidic Corrosion Resistant
- Double-layer Leak-proof
- Customize for Manual and Fully Automatic
- Recycled and Reused Acid
- ISO9001 Quality Assurance

Application

- Wafer Front-End Cleaning
- Photolithography Cleaning
- Etch Post-Cleaning
- Thin Film Cleaning
- Back-End Packaging

Specifications:

Parameter	Descriptions
Tube Size	Φ450mm
Control Part	PLC and HMI
Gas Projection	CDA/N ₂
