

Vertical dryer

Model: SA-VLD-48LS

SA-VLD-48LS is driven by high-performance brushless motors for stable operation. It adopts nitrogen sealing to maintain a pure internal environment. Integrating multiple processing functions, it efficiently removes residues and particles. Built with static elimination and self-reset designs, it features comprehensive safety protection, perfectly adapting to high-standard semiconductor production.

Embrace Innovation
SA-VLD-48LS

Feature

- Brushless Motor
- Nitrogen Sealed Rotating Shaft
- Static Elimination Function
- Mechanical Self-reset Function

Application

- Silicon Wafer
- Lithography Wafer
- Glass Substrate
- Watermark-free Surface Treatment
